Hi Karissa

Happy New Year! Apologies for the delay in responding but I have not long returned from my summer holidays and have been trying to catch up with the preparations for the meeting starting shortly.

In regards to Dechlorane Plus, I can't actually recall much about it from the last meeting – that seems so long ago now! Also I think I was mainly pre-occupied with [redacted] at that meeting. In terms of how it will go at this meeting, that will really depend on the comments to be made by the members, and I do note that there are some who would appear to share your view. There is a revised risk profile and a response to comments document available as CRPs 2 and 3 on the Intranet site now.

I look forward to 'seeing' you very shortly.

Cheers
Peter

Dear Peter,

Happy New Year! We hope you are doing well and look forward to “seeing” you at the POPRC meeting next week! 

Ex. 5 Deliberative Process (DP)

We wanted to raise an issue with you in advance of the meeting, related to the Dechlorane Plus draft risk profile. We have the same concerns about the lack of evidence presented on adverse effects as we and others had at the last meeting.
